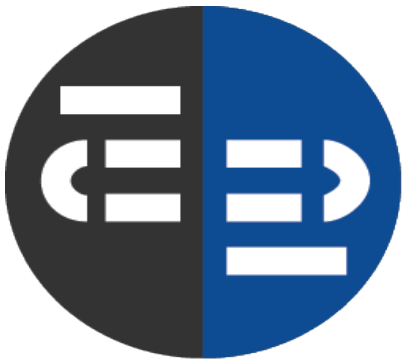
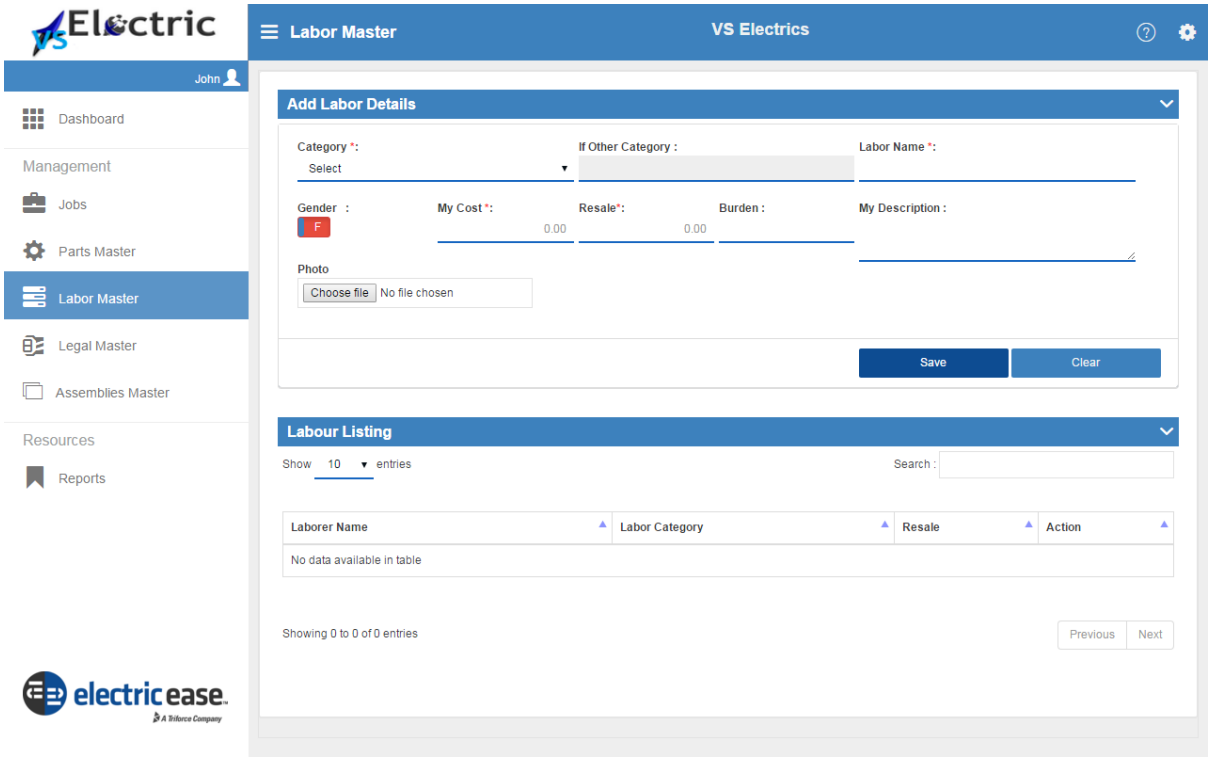
Electric Ease– User Guide



Labor Master:

- Client Admin and Client User has rights to Create Labour Details for the company using the Labour Master Screen.
- Labour Master has 2 Component, Add Labour Details, Labour listing
  1. **Add Labour Details**: To Add /Modify Labour Details
  2. **Labour Listing:** To view the details of Labour created for the client



Example:

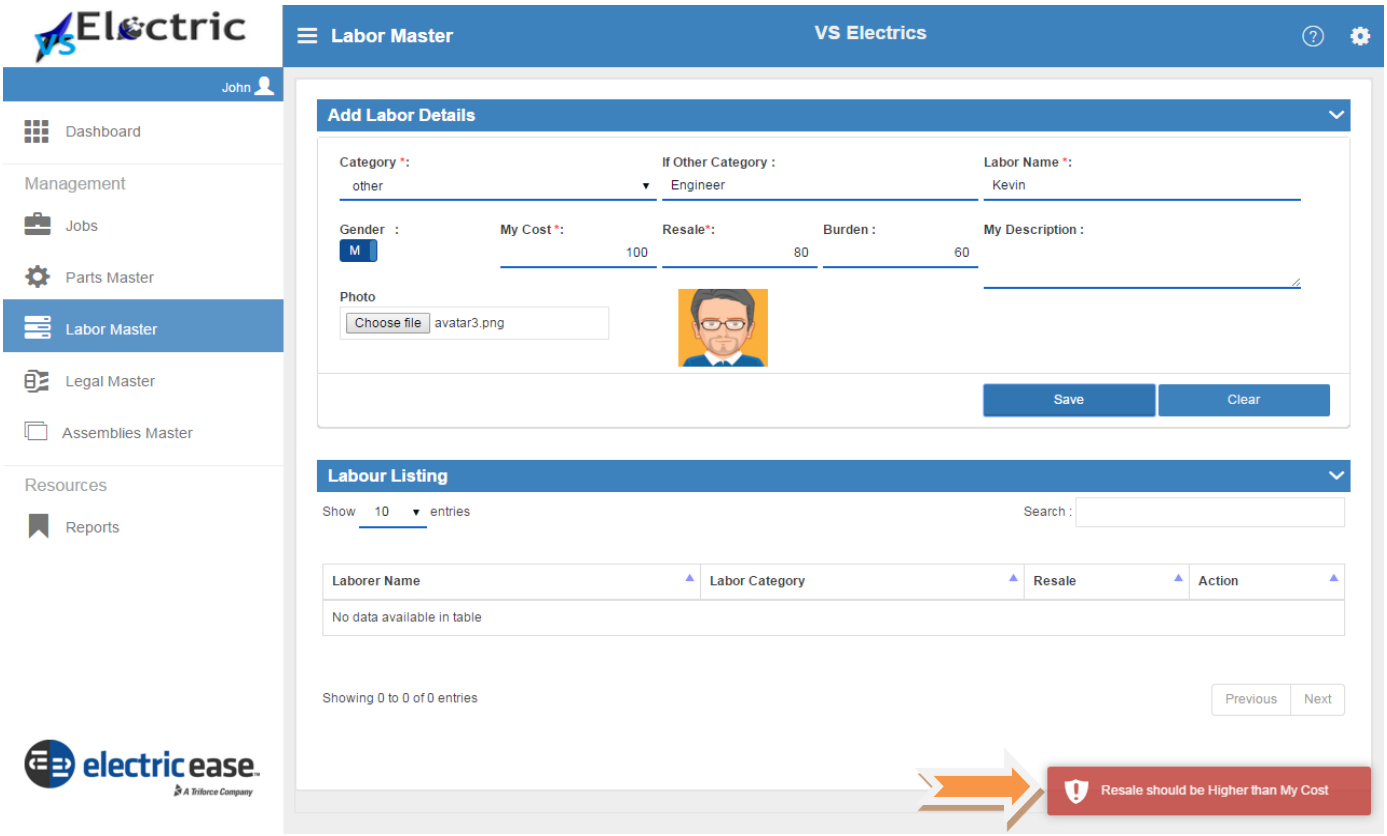
- Here Client Admin has All rights ,but client users rights may restricted depend on the **Labour Master Rights**, if client user has Labour Master Rights ,they can Add/modify/view labour Details

I have created 2 client users

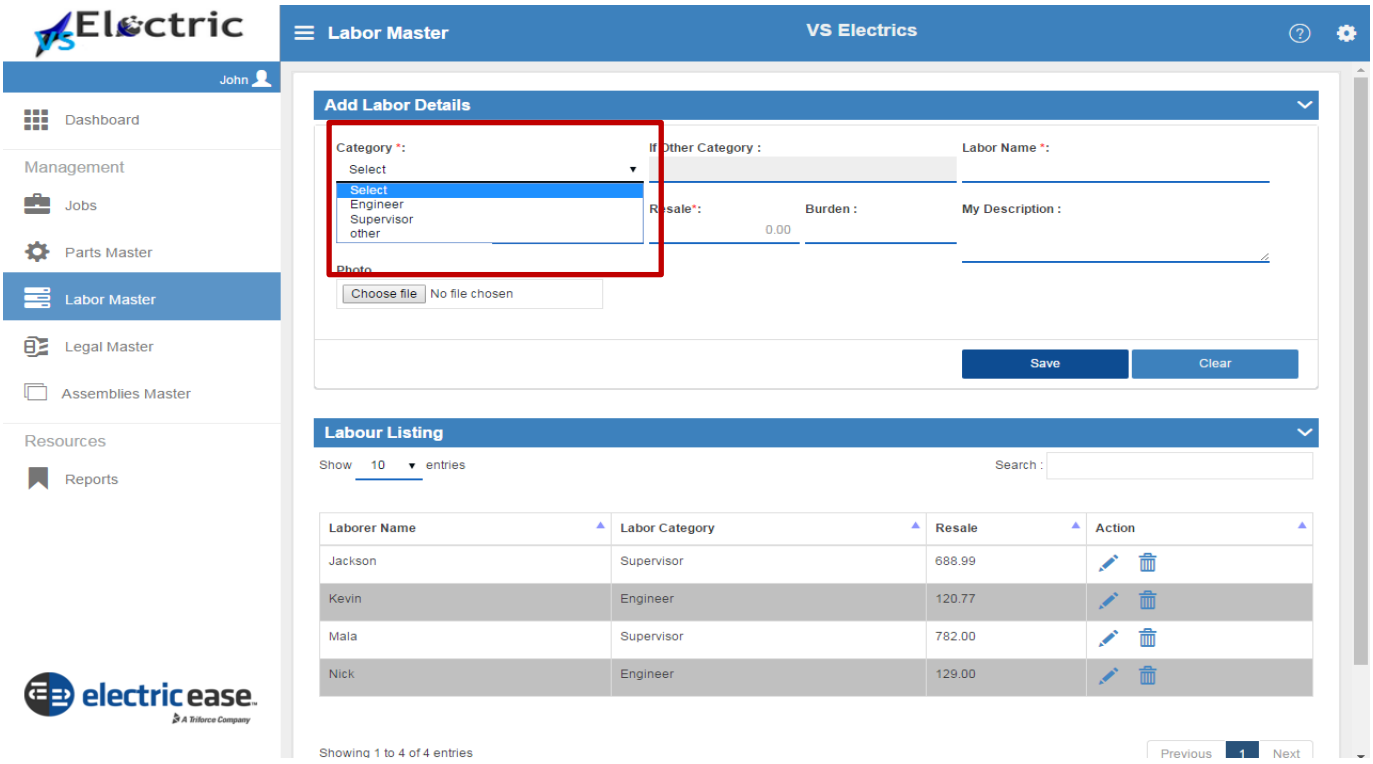
User 1:

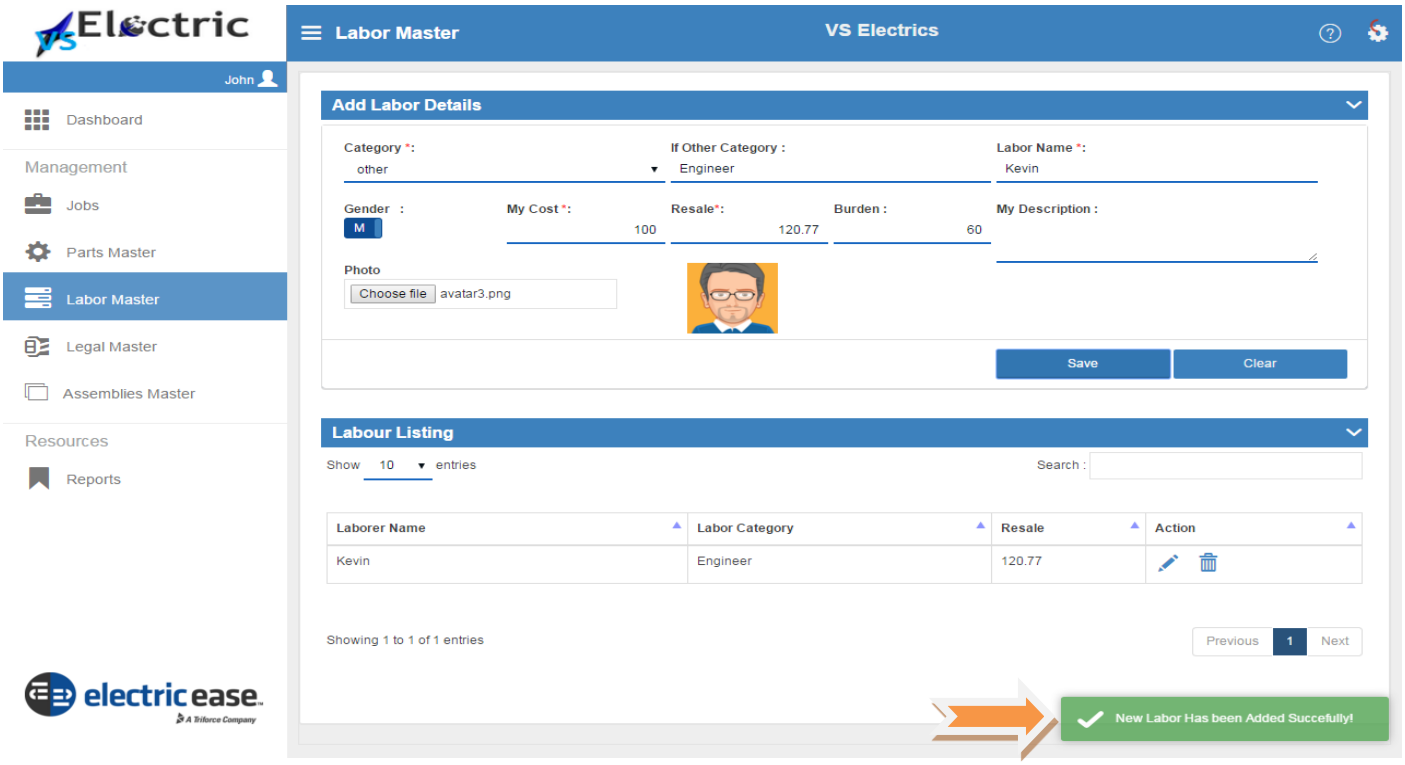
Client User Name: John
Client User Pssword: *******

- If the User has Labour Administrative Rights he/she can add/modify the user content else he/she can only view Labour list.
- Always, "**Resale Cost**" field should be higher than "**My Cost**" field, Else error message will be produced as "**Resale Cost should be higher than My Cost**" when "**Save**" button is clicked.



- Then, In Add Labor Details**,**User can choose Category from "Category" drop down or he/she choose "other" from list and add a new category in the field **"If Other Category"**. **"If Other Category"** field is Disable until you select "**other** " in category field





Then, After Adding a Labour Details User will receive Success message as "**New Labor has been Added Successfully**". Labour details will be added in a "Labour Listing"

Editing Labor Details:

- To edit the Labor details click on edit button
- Once the Labor details is updated we will get a successful message at bottom right corner as "**your changes has been Modified Successfully**"
